Project Title	The post is offered as a part of the project entitled „Playing urban mobility games with intelligent machines. Framework to discover and mitigate human-machine conflicts” (acronym: COeXISTENCE) financed under the ERC Starting Grant.
Project description	In COeXISTENCE, with the team of 5, we try to foresee what happens when our cities are shared with autonomous, intelligent robots - competing with us for limited resources. We create virtual environments where individual agents compete to arrive faster, more reliably and cheaper at their destinations. Human agents are simulated with detailed behavioural models, estimated and calibrated on the field data to reproduce how we behave and adapt in the cities. In the same environment the deep learning agents try the same - they use deep reinforcement learning to maximise their rewards. This creates a harsh competition in which machines have upper-hands strong enough to beat us.
