

Jagiellonian University in Kraków promotes cooperation and cares for a good atmosphere based on mutual trust. It implements the strategy resulting from The Human Resources Strategy for Researchers, creating stable conditions for employment as well as the development of academic career, which resulted in the award of the HR Excellence in Research by the European Commission

INFORMATION ON SELECTION PROCEDURE

Date of selection procedure announcement Krakow, 23.01.2024

Selection procedure information number given by the Centre for Human Resources	1227.1101.18.2024
Dean of the faculty of /Director of a non-faculty, inter-faculty or common unit	Dr Danuta Earnshaw Mossakowska, prof. UJ Director of the Malopolska Centre of Biotechnology
Address	Gronostajowa 7A, 30-387 Kraków

RECTOR

of the Jagiellonian University

announces a selection procedure for the position of an

ASSISTANT PROFESSOR

Group of employees	Research staff
JU organisational unit (place of work performance)	Malopolska Centre of Biotechnology
Field of science	Natural sciences
Discipline	Biological Sciences
Scope	Molecular and structural biology, biotechnology
Number of posts	1
Type of employment	Fixed-term employment contract

Working time	Full- time
Planned duration of employment	3 years
Expected date of employment commencement	The first quarter of 2024.
Remuneration	according to the Rules for Remunerating Jagiellonian University Employees
Requirements	<p>The selection procedure is open for all individuals, who meet the requirements set out in Articles 113 and 116.2.3) of the Act of 20 July 2018 – Law on Higher Education and Science, and who meet the following eligibility criteria according to § 165 of the Statute of the Jagiellonian University:</p> <ul style="list-style-type: none"> • holding at least a doctoral degree; • having relevant scientific achievements; • taking active part in scientific life.
Additional requirements and expectations	<ol style="list-style-type: none"> 1. PhD degree in biophysics, computational biology, chemistry, bioinformatics, or a related field. 2. Experience in performing molecular dynamics simulations / Monte Carlo simulations / docking simulations, as well as experience in constructing models of large biomolecular complexes. 3. familiarity with Unix and programming experience (python, bash) are essential. 4. Knowledge of cell biology and experience in large-scale simulations are welcome. 5. Excellent communication skills and fluency in English. 6. Interpersonal skills.
Project Title	“Dioscuri Centre for Modelling of Posttranslational Modifications of membrane proteins”
Project description	<p>We are currently seeking applications for a 3-year Postdoctoral position to explore the interactions between glycoproteins and the extracellular matrix (ECM) components. The ECM is a multifaceted web of proteins and carbohydrates that constitutes the structural underpinning of biological tissues. Glycans, the carbohydrate moieties that decorate majority of membrane proteins, are generally expected to shield intermolecular interactions. Glycan types are frequently altered in conditions ranging from neurological diseases to congenital disorders of glycosylation, but the role of glycans in these diseases remains poorly understood.</p> <p>Preliminary results from our experimental collaborators have indicated that the mobility of glycoproteins in the ECM varies depending on their glycotypes, especially in neuronal contexts, with potential severe functional consequences. The mechanisms by which glycans modulate these interactions on the molecular level, and the implications for diseases, particularly neurological conditions, remain poorly understood.</p> <p>Objectives:</p> <p>Multi-Scale Modelling of ECM: Using state-of-the-art cryo-electron tomography reconstructions and results from mesoscopic simulations performed by our collaborators develop atomistic and coarse-grained simulation models of the ECM.</p> <p>Dynamic Analysis of Glycoproteins: Investigate how glycan modifications influence the diffusion properties of glycoproteins, with a focus on neurotransmitters and synaptic components within the ECM.</p> <p>Experimental-Computational Synergy: Work closely with glyconeurobiology experts to cross-validate our computational</p>

	<p>findings with single-protein tracking experiments.</p> <p>Disease Relevance and Translation: Uncover how the altered glycan interactions contribute to neurological diseases. Our work aims to shed light on the mechanics of synapses and neurotransmitters, offering routes for novel therapeutic strategies.</p> <p>By engaging in this project, we aspire to offer comprehensive insights into the pivotal role glycans play in ECM interactions and neuronal function, thereby creating a ripple effect across neurobiology, pharmacology, and medical research.</p> <p>The successful candidate will be a part of the Dioscuri Centre for Modelling of Posttranslational Modifications, which is an integral part of the Dioscuri Program, a Max Planck Society initiative, co-funded by the German and Polish Ministry of Science.</p> <p><i>The Malopolska Centre of Biotechnology and the Dioscuri Centre strive to ensure a workplace with equal opportunities. We celebrate diversity and are committed to creating an inclusive environment for all members irrespective of gender, nationality or disabilities.</i></p>
<p>Scope of duties</p>	<p>according to the Work Regulations of the Jagiellonian University Annex 1 to the Work Regulations of the Jagiellonian University – Model scopes of responsibilities and duties of academic teachers.</p>
<p>We offer</p>	<ul style="list-style-type: none"> • stable employment based on an employment contract at the renowned university, • cooperation with the interdisciplinary academic community represented by well-known scientists, • scientific support as well as the possibility of qualifications improvement and professional development, • access to research infrastructure, • competitive salary, • close interactions with Dept of Theoretical Biophysics at the Max Planck Institute of Biophysics (partner of the Dioscuri Centre), • benefits in the form of sports activities - Multisport card, medical packages, group insurance, • opportunity to enjoy additional social benefits.
<p>Required application documents</p>	<ol style="list-style-type: none"> 1. resume, 2. personal questionnaire filled in by the candidate, 3. copy of the doctoral diploma or a diploma confirming the candidate's habilitation degree, if applicable, 4. information on the candidate's scientific, teaching and organizational achievements, 5. declaration of the candidate, confirming that the Jagiellonian University will be their primary place of work, should they be selected in the selection procedure, 6. statement under Article 113 of the Law on higher education and science, 7. statement on acknowledging and accepting the rules and regulations concerning intellectual property management and commercialization in force at the Jagiellonian University. <p>Declaration forms (no. 5-7) and personal questionnaire template (no. 2) can be obtained at: https://cso.uj.edu.pl/en_GB/dokumkandyd</p>
<p>Additional application documents</p>	<ul style="list-style-type: none"> • list of publications (along with respective publishers and page numbers), Electronic versions for non-open access publications, • review of doctoral or habilitation dissertation, if applicable, • recommendation regarding the candidate's predisposition for research and teaching work, including the results of student

	surveys and evaluations, if the candidate was subject to such evaluation,
The course of selection procedure	The first stage of the selection procedure is the formal assessment of the submitted documents. Applications which meet all formal requirements are the subject of substantive assessment, during which an interview with the Candidate may be conducted (directly or via electronic communication channels), upon settling the date of the interview with the Candidate. The Candidate has the right to appeal against the negative assessment by the selection board within 7 days from receiving the information about the results of the assessment. The selection procedure is conducted in accordance with The Policy of Open, Transparent and Merit-Based Recruitment Process at the Jagiellonian University .
Form of submission	by e-mail to the address: job.mcb@uj.edu.pl, title: "Assistant Professor (Post-doc) - Dioscuri"
Deadline for submission of applications	06.02.2024
Expected date of the selection procedure settlement	21.02.2024
Method of communicating of the results of the selection procedure	by e-mail
Questions	For further information please contact dr. Mateusz Sikora, e-mail address:mateusz.sikora@uj.edu.pl, job.mcb@uj.edu.pl

In the selection procedure, Jagiellonian University follows the principles of the European Charter for Researchers and a Code of Conduct for the Recruitment of Researchers. Jagiellonian University does not provide housing.

On behalf of
the Rector of the Jagiellonian University

Director of the Malopolska Centre of Biotechnology
Dr Danuta Earnshaw Mossakowska, prof. UJ

Personal data processing information for job applicants

According to Article 13 of the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation – hereinafter GDPR), the Jagiellonian University informs that:

1. The Administrator of your personal data is the Jagiellonian University with its registered office in Gołębia 24, 31-007 Kraków, represented by the Rector of UJ.
2. The Jagiellonian University appointed the Data Protection Officer www.iod.uj.edu.pl, Gołębia 24, 30-007 Kraków. The Officer can be contacted by email: iod@uj.edu.pl or at the telephone number 12 663 12 25.
3. Your data will be processed to:
 - a. conduct the recruitment process for the position specified in the above advertisement – as part of the legal obligation of the Administrator under Art. 6 (1) lit c of the GDPR in connection with the Polish Labour Code;
 - b. conduct the recruitment process for the position specified in the advertisement based on your consent under Art. 6 (1) lit a of the GDPR – your consent is granted by the clear action of submitting your CV with the Administrator. The consent to the processing of personal data concerns data that you voluntarily provide as part of your CV, which do not result from Polish Labour Code.
4. The obligation to provide your personal data results from the law (it applies to personal data processed under Article 6 (1) lit c of the GDPR). Failure to provide you personal data will result in your inability to take part in the recruitment process. Submission of personal data processed on the basis of consent (Article 6 (1) lit a of the GDPR) is voluntary.
5. Your data will be processed during the recruitment period. In the event of not concluding the contract with you, your data will be deleted after the recruitment process.
6. You have the right of access to the content of your personal data, as well as the right to correct, delete, restrict processing, transfer, object to processing – on the terms and conditions set out in the GDPR.
7. If the processing is based on consent, you have the right to withdraw the consent at any time, which shall not affect the lawfulness of processing based on the consent given before the withdrawal. Withdrawal of consent to the processing of personal data can be sent by e-mail to: mcb@uj.edu.pl or by post to the following address:
Małopolskie Centrum Biotechnologii, Uniwersytet Jagielloński, ul. Gronostajowa 7A, 30-387 Kraków,
or you can withdraw your consent in person at **Małopolskie Centrum Biotechnologii, Uniwersytet Jagielloński, ul. Gronostajowa 7A, 30-387 Kraków.**
8. Your personal data will not be subject to automated decision making or profiling.
9. You have the right to lodge a complaint with the Inspector General for the Protection of Personal Data, if you feel that the processing of your personal data violates the GDPR regulations
